

Project Name: Orthopedic Partners

Project Location: Norwich, CT

Project Overview

The Orthopedic Partners, formerly known as Norwich Orthopedic Group renovated its medical office building. They treat sport related injuries, offer physical therapy, perform X-ray examinations, and athletic training. It was important that NEIS provide casework solutions to meet the needs of their staff so they can provide quality service to patients. Included in the project scope were redesigned examination/treatment procedure rooms, nurse stations, and a state-of-the-art x-ray facility. NEIS installed Case Systems plastic laminate casework throughout the office building.

- Case Systems' Plastic Laminate Casework
- Architectural Millwork by Artisan Millwork
