

Project Name: Owego Apalachin Elementary School

Project Location: Owego, NY

Project Overview

The Owego Apalachin Elementary School classroom design required NEIS and our partner CiF Lab Solutions to think outside the box and get creative on this highly customized plastic laminate casework order. This k-12 project required modified plastic laminate casework fabricated with over thirty-five different color combinations. Some cabinets reaching ten feet high. Custom pulls and hidden hardware requirements were also designed to give these cabinets a unique look at a lower cost, compared to the typical wood case work classroom.

- CiF Plastic Laminate Case Work

Project Statistics

- Project Size: 120,000 sq. ft.
- NEIS Contract Amount: \$679,000

Project Participants

- Architect: Highland Associates, Ltd.
- General Contractor: Daniel J. Lynch
- Construction Manager: Lend Lease
