

Project Name: Penn State University - Whitmore

Project Location: State College, PA

Project Overview

This 90,600 sq. ft. complete renovation transformed the 1953 preexisting Whitmore Laboratory at Penn State University into a state-of-the-art facility. The Whitmore Laboratory features a modern flexible space that promotes safety and functionality for its undergraduate Chemistry students and faculty members. Northeast Interior Systems was challenged with remodeling a pre-existing structure that was built during 1953. Creating a modern cutting edge laboratory within a preexisting historical structure required Northeast Interior Systems to think outside the box with its design strategy and implementation.

- CiF Plain Slice Maple Wood Casework
- Labconco Fume Hoods
- Durcon Epoxy Countertops

Project Statistics

- Project Size: 96,000 sq. ft.
- NEIS Contract: \$2 million

Project Participants

- Architect: Stantec
- General Contractor: Barton Malow Construction
