

Project Name: Westinghouse Electric Company

Project Location: Cranberry Township, PA

Project Overview

Westinghouse Electric Company relocated one million sq. ft. of corporate offices to four separate buildings in Cranberry Township, Pennsylvania. The company needed more space to fill a worldwide demand for nuclear power plants. This project was completed in four phases and is LEED certified. NEIS provided custom millwork and plastic laminate casework for the reception areas, break areas, cafeterias, conference rooms, board rooms, and general office spaces.

- Case Systems Plastic Laminate Casework
- Creative Laminates Millwork Solutions
