

Project Name: State College Area High School

Project Location: State College, PA

Project Overview

The multi-year/phase expansion and renovation of the 500,000 sq. ft. State College Area High School took a dedicated team of construction professionals to complete. Approximately 2,500 students began occupying the space after 60% of the job was completed during phase 1 out of 3. NEIS was selected to provide the high school with a Division 6 millwork and Division 12 casework package. Case Systems provided Fusion Maple and Aloe Wilsonart plastic laminate casework colors along with Blue Shimmer by Nevamar, and Black Rift Wood by Mica. The science rooms feature inset style casework, and full flush overlay style throughout the rest of the school. NEIS installed decorative interior wall paneling and louvers in the large group instruction (LGI) room and auditorium.

- Case Systems Plastic Laminate Casework
- CiF APEX Air Fume Hoods
- Labconco Ductless Mobile Fume Hoods
- Custom Millwork Solutions

Project Statistics

- Project Size: 500,000 square feet
- Total Construction Cost: \$137 million
- NEIS Contract: \$3.4 million

Project Participants

- Architect: Crabtree Rohrbaugh & Associates
- Construction Manager: Massaro Construction Management
- General Contractor: Lobar Construction
